- 12 Months Support

## Product Selection

### Standard or Professional Licence?

In order to provide a monitoring solution that fits all budgets and industries, WinKontrol 2007 has two versions; Standard and Professional. The functionality of the two versions is identical, the difference is the capacity of the system.

**Standard** is limited to; 2 PES Sensors / 10 employees / 50 Checkpoints / 1 Event Pad.

**Professional** is a completely unlimited system.

(The option to upgrade from Standard to Professional can easily be provided by email if any of the limitations are reached).

### Selecting the PES Sensor.

The main difference is the event capacity of the sensor, take into account the number of events (i.e. checkpoints/guards/incidents) that each patrol sensor has to retain before being downloaded into the PC or data tag. For example, if there are 25 checkpoints and 10 patrols per day downloaded once per week,  $25 \times 10 \times 7 = 1750$ , therefore the PES Profi is selected as it has a 2000 event capacity.

Mini Vandal Protection indicates that an attempt has been made at damaging the PES sensor, Anti Vandal defines the type of damage (3 levels of G-force, high voltage, microwave and short circuit).

#### PES Mini Sensor

- 200 event capacity
- 10 Year Battery
- 1 year Warranty

#### PES Forte Sensor

- 1000 event capacity
- 10 Year Battery
- 2 Year Warranty
- Mini Vandal Protection System

#### PES Profi Sensor

- 2000 event capacity
- 10 Year Battery
- 5 Year Warranty
- ANTI-Vandal Protection System
